

5<sup>th</sup> August, 2015

## FOR IMMEDIATE RELEASE

Ulterra's Fort Worth Repair Facility achieved 365 days with no recordable incidents on June 17<sup>th</sup>, 2015. This performance represents a tremendous improvement from the previous year when the facility experienced 4 recordables.

This improvement in safety performance was accomplished through increased emphasis in several areas. Every aspect of safety performance was evaluated and the facility supervision and shop workers worked to keep safety awareness high and to complete each shift with no recordables.

This achievement was made possible by total commitment from everyone in the facility from the floor workers to shop supervision and plant management.

Working safely is important to Ulterra for several reasons:

- (1) It is critical to the health and wellbeing of Ulterra employees.
- (2) It impacts our insurance premiums.
- (3) It impacts Ulterra's ability to expand our customer base.

Fort Worth Repair is understandably proud of working a year with "No Recordables"; however, they are not satisfied and won't stop there. They are now working to get to year two with no recordables!
